

# Vocabulary and Section Summary

## Tides, the Sun, and the Moon

1. tide

---

---

2. tidal range

---

---

3. spring tide

---

---

4. neap tide

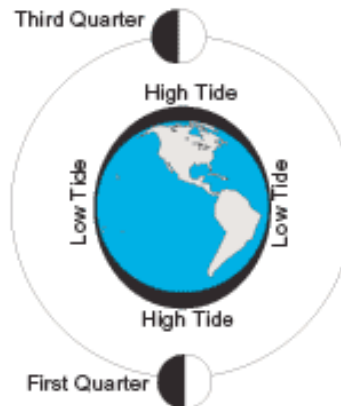

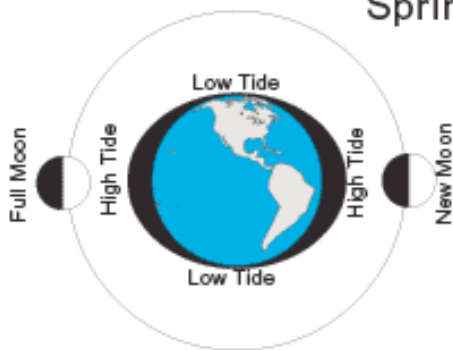

---

---

### SECTION SUMMARY

- Tides are caused by the gravitational forces of the moon and sun on Earth.
- The moon's gravity is the main force behind the tides.
- The positions of the sun and moon relative to the Earth cause tidal ranges.
- The four types of tides are high tides, low tides, spring tides, and neap tides.

### Spring Tides

### Neap Tides
